PROFESSIONAL EXPERIENCE

The Firm Consultant | Full-Stack Software Developer

April 2026 – Present

- Develop and maintain full-stack business applications using Laravel, React.js, Vue.js, Livewire, MySQL, and PostgreSQL.
- Build filing, BIR form generation, document tracking, queue management, and workflow automation systems.
- Develop frontend interfaces, backend logic, REST API integrations, and database workflows.
- Migrate selected Livewire interfaces to Vue.js.
- Implement features, troubleshoot issues, test applications, update databases, and support deployment.
- Translate business requirements into practical software solutions.

The Firm Consultant | Full-Stack Software Developer Intern

January 2026 - April 2026

- Developed and maintained internal web applications, including a ticketing system and document hub.
- Built email-fetching and document-merging features to support internal workflows.
- Implemented frontend and backend functionality using Laravel and JavaScript.
- Performed testing, debugging, database updates, and application improvements.

EDUCATION

Pampanga State University – Lubao Campus

Bachelor of Science in Information Technology

August 2022 – August 2026

Cum Laude

HONORS & AWARDS

Programming of the Year & Best Presenter

PROJECTS

Filing

Laravel | React.js | PostgreSQL

- Developed a centralized filing system for generating and managing BIR forms.
- Built features for document organization, search, review, retrieval, and filing workflows.
- Automated form preparation to reduce repetitive data entry and improve processing accuracy.

QueueConnect — Queue Management System

Laravel | React.js | Flutter | PostgreSQL | Laravel Reverb

- Developed a queue management system integrated with Flutter-based kiosks.
- Built appointment booking, service management, queue processing, and customer feedback features.
- Implemented real-time queue updates using Laravel Reverb.
- Implemented online-offline synchronization to support operations during internet interruptions.

PLCHUB — Capstone Project

Laravel | Livewire | Laravel Reverb | MySQL | DigitalOcean

- Sole developer of a campus social platform with real-time chat, voting, advertisements, user following, and a personalized newsfeed.
- Developed frontend and backend functionality, database structure, and application features.
- Integrated Laravel Reverb for real-time messaging.
- Deployed the application on DigitalOcean.
